Residency Training Opportunities in Psychiatric Pharmacy

“If you are interested in improving outcomes and lives for patients with mental illness, then you should consider post-doctoral training in psychiatric pharmacy.”

Christopher Thomas, PharmD, BCPP, BCPS
CPNP Board Member, Clinical Pharmacist in Psychiatry
PGY-2 Residency Director, Chillicothe VAMC
Chillicothe, OH
What You Gain by Completing a Psychiatric Residency

“Psychiatric residency not only prepared me to contribute to the clinical management of psychotropics but also to function as a skilled mental health care professional.” – Michelle Colvard, PharmD, BCPP

“Having the opportunity to collaborate daily with interdisciplinary mental health team members throughout a 12 month experience.” – Jonathan Lister, PharmD, BCPS, BCPP

“Working as a psychiatric pharmacy specialist is challenging, fast-paced, and satisfying all at the same time. It is a honor to care for our Veterans with mental health needs especially in a time when they need it the most.” – Funmilayo Muyide, PharmD

“The level of direct patient care in my residency honed my skills and developed me into a confident, competent provider of medication management services—as well as a creative problem solver!” – Robert Schmidt, PharmD, BCPP
